

**NEW YEAR:  
NEW HORIZONS**

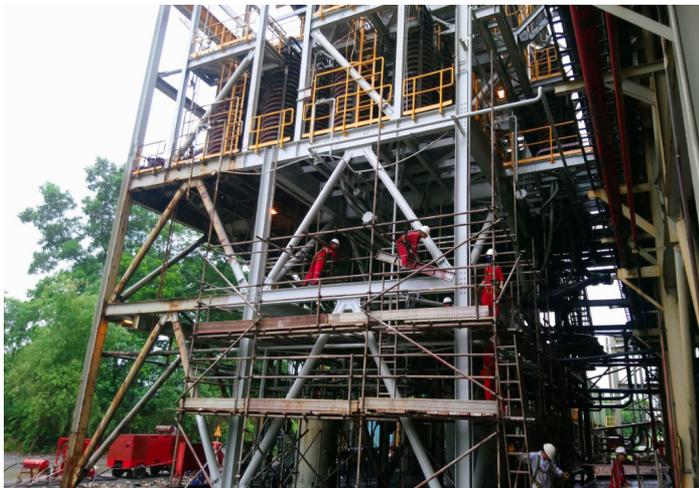

January is the wonderful time of the year when VIVABLAST team comes together to celebrate the victories of the old year and to discuss the goals we want to achieve in the new one. What better way to do this than to unite both management and staff in a friendly game of football!

After exciting matches and a cozy party, our team did reflect on the great work done in 2019. Many people were thanked personally for their contributions towards a year which was filled with achievements, and even some ground-breaking new services.

VIVABLAST looks forward to reaching even more targets in 2020, a New Year that will be filled with promise and potential. We wish our readers a blessed and prosperous Year of the Rat!

**ONGOING EXCELLENCE:  
LASTING CORROSION CONTROL**

In 2019, VIVABLAST was commissioned to provide corrosion control for one of the biggest mining companies in South-East Asia. Protecting metal infrastructure, vehicles and machinery is particularly specialised in this hazardous environment.

Over the past year, our experts have effectively controlled corrosion here, which ensures the operational safety of the mining activity, as well as the safety of workers on-site. We are potentially considered to continue providing the same level of excellence throughout 2020.

**ADVANCED TRAINING:  
WIND TURBINE BLADE REPAIR**

VIVABLAST staff members are always trained to an advanced level for all of our service sectors. For our clients in the wind industry, we recently sent our technicians to China to be trained by one of the biggest manufacturers of turbine blades in the world.

The team completed this program with great success and is now fully certified to do inspections and repairs on this leading manufacturer's turbines. This high-level procedure can also be applied across our turbine solutions.
