

■ VIVABLAST ISO & OHSAS TRAINING

■ Discipline in work practices are the prerequisite that **VIVABLAST Employees** encompass. By organizing periodic **ISO and OHSAS** training courses and audits and frequent practice our company employees promote understanding and compliance in work practice to improve our QHSE management.

■ VIVABLAST MANUFACTURING PROJECT

■ **VIVABLAST** further innovate in providing suitable Industrial asset protection solutions. Our Industrial Asset Cleaning team recently executed several Heat Exchanger tube cleaning work as part of a major fertilizer Plant shutdown. In order to perform thorough tube cleaning, **Vivablast** uses special rotational nozzles coupled to high flow Ultra-High Pressure water jetting. This proven industrial cleaning method is safe, efficient, cost effective and reliable.

■ VIVABLAST SHIP BUILDING PROJECT

■ **VIVABLAST**, is performing this December its second 70 meters Aluminium catamaran coating work at Vietnam first leading innovative Ship Builder in Vung Tau. All coating application shall be done using Cisor Lift and Cherry pickers; our Vivablast seasoned employees shall ensure quality, safety in line with client's schedule requirement.

■ VIVABLAST WATER TREATMENT PROJECT

■ **VIVABLAST** has been called out on an urgent water-proofing work for a key water pipeline project which supplies 1.7 million cubic water per day to the City. This work uses the latest techniques and products for live leak repairs. It requires an absolute compliance to procedure while observing strict safety. **VIVABLAST** further innovate and develop in Industrial water treatment solutions coupled with the use of latest repair techniques and products.
