BLADE INSPECTION TRAINING WITH GLOBAL WIND ACADEMY

Possessing over 20 years of experience in the Wind Power Industry, Global Wind Academy is a distinguished expert in the field of wind turbine inspections and servicing, founded in Denmark.

VIVABLAST Team was delighted to welcome Academy's professional instructor at our training facility in the company's headquarters. The instructor was invited to conduct a thorough and detailed training program, that included a theoretical and a "step-by-step" practical part, concluded with a final test.

We are proud to announce that the VIVABLAST technicians in attendance have successfully mastered the procedures of the fan blade inspection, repair, and lightning protection system (LPS) analysis. The technicians that completed the training program were qualified by Global Wind Academy and are awaiting to receive their certification imminently. ■
