

PROTECTION SOLUTIONS

ZINGA SUPPLY

This month, Vivablast takes immense pride in its role in the successful corrosion protection project at the Ca Mau power plant, contributing significantly to the plant's structural integrity and lifespan.

The entire steel framework underwent meticulous on-site repairs and surface preparation before the coating process commenced. Our contribution includes the utilization of the ZINGA waterproofing system, a single-component coating boasting a remarkable 96% zinc content in the dry film. Accompanying this is the high-standard ZINGAsolv solvent, crucial components for safeguarding metal cathodes. This system stands as the primary alternative to conventional methods like hot-dip galvanizing or metal plating, ensuring long-lasting protection. All of this was expertly executed by our dedicated and professional team of experts. ■

PROTECTION SOLUTIONS

EQUIPMENT RENTAL SERVICES

Vivablast's RFQ 9560 - Storage Container Supply service at PM 2.2 plant is designed to provide you with seamless and efficient solutions for your storage needs. We commit to delivering three 40'HC containers within a six-month ensuring your timelines are met.

Our skilled workforce will swiftly unload two sets of filters and pre-filters from seven 40ft trucks into containers, completing the task within two days. Additionally, we handle the mobilization and demobilization of three 40' containers, simplifying logistics. Count on Vivablast for high-quality materials and professional service, tailored to meet your storage container requirements effectively. ■

RENEWABLES SOLUTION

BLADE REPAIR

Vivablast has established a presence in Trà Vinh to conduct professional repairs for numerous wind turbine blades currently in operation at our customer's wind farm. We are committed to maintaining the customer's turbine operations, ensuring that these critical tasks are carried out in a timely and professional manner.

Our highly skilled technicians are fully IRATA certified (including IRATA Level 1, 2, 3 supervisors) and also hold certifications in GWA and GWO safety standards. This guarantees that blade repairs are performed to the highest service and safety standards. ■
