

ISO QUALIFICATION

QUALITY, SAFETY AND ENVIRONMENTAL COMMITMENT

ISO
9001
45001
14001

We are proud to announce that Vivablast has officially achieved triple ISO certification (International Organization for Standardization) by Bureau Veritas. Since our first certification in 2010, we have successfully obtained ISO 9001, ISO 45001, and ISO 14001, recognizing our commitment to maintaining the highest industry standards. This milestone reaffirms our commitment to superior quality control, strict safety compliance, and efficient environmental responsibility. These achievements align with Vivablast's long-term orientation towards sustainable development, focusing on innovative solutions for renewables and environmentally friendly energy sources.

We want to extend our appreciation to the incredibly hard-working, creative and dedicated team of Vivablast, whose efforts have been the driving force behind this achievement. Sincerely, Vivablast wants to show gratitude to our valued clients for their unwavering trust and support, which have been instrumental in our journey towards success. Vivablast is always dedicated to continuous improvement and elevating our commitments, ensuring our growth in the international market for years to come. ■

RENEWABLE ENERGY

AUTOMATED DRONE INSPECTION OF WIND TURBINE BLADES

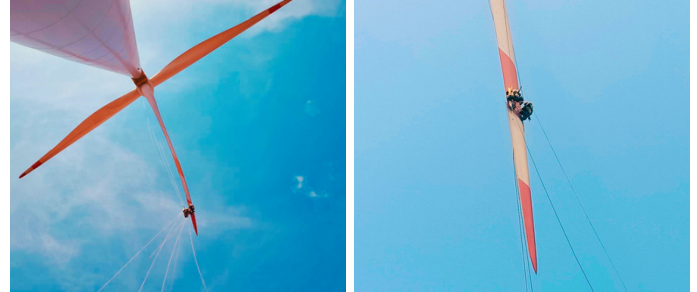

In May 2024, we have been delivering wind turbine external blade inspection service for the wind farms in Vietnam with our cutting-edge inspection technology, an Unmanned Aerial Vehicles (UAVs) Drone. The project was successfully carried out by highly skilled on-site pilots, adhering to wind industry standards to ensure beneficial results.

After each 40 minutes per turbine flight mission, automated images were uploaded to the cloud database for further analysis. The analysis report will be swiftly generated by artificial intelligence. The blade expert team review and validate the whole AI report, ensuring its accuracy before final release. The detailed report showcases damage clarification, repair-work plan and schedule for preventive maintenance, thereby minimizing downtime, lowering costs, and mitigating potential risks. ■

RENEWABLE ENERGY

WIND BLADE REPAIR BY ROPE ACCESS TECHNICIAN

One of the most impressive projects executed by VIVABLAST this month was wind blade repair by rope access team for a well-known Wind turbine OEM in the market. Our skilled and experienced technicians provided repairs for all categories of damage/ defect on wind blades for one of onshore wind farms in the Central of Vietnam. Using rope access techniques, we handled the job at most challenging heights, while saving time and costs, minimizing downtime and heavy machinery to keep wind turbine blades in prime shape and turn robustly for optimal power generation.

With our proven expertise in the wind industry, VIVABLAST team of experienced technicians, equipped with internationally recognized certifications - IRATA (Rope Access), GWO Basic Safety Training (BST), and GWO Blade Repair, are able to ensure the safety and efficiency of every project. We diligently adhere to project timelines while maintaining our unwavering commitment to safety as the top priority. ■

OIL & GAS

INTEFORGE PIPE SPOOLS COATINGS

Another assignment perfectly done by the VIVABLAST team was external coating service for Inteforge Pipe Spools. To ensure exceptional resistance to corrosion, erosion, and chemical attacks, our highly skilled technicians at Vung Tau Workshop thoroughly performed a full process including cleaning, blasting and painting the spools. We strictly adhered to international coating standard to ensure optimal performance of the structure by extending their lifespan, reducing overall friction.

Implemented throughout the entire process, comprehensive quality control by NACE certified Qualified Coating Inspectors guaranteed exceptional project results. As the one-stop shop approach, Vivablast is honored to provide a full package of protection services for various structures/ components, guaranteeing timely execution and exceptional outcomes for our clients. ■
