

GC WIND SUPPLY JOINT VENTURE
A COMBINED FORCE IN WIND ENERGY

GC Wind Supply, a strategic partnership between GC Wind Services (Australia) and Vivablast SEA (Singapore), unites expertise to deliver comprehensive wind energy solutions across Australia and New Zealand.

GC Wind Services offers a well-established presence in the region, providing a wide range of services for wind energy and telecommunications infrastructure. Vivablast, a global leader in industrial asset life cycle management, brings nearly 30 years of experience to the table. Together, this combined force offers OEMs and plant owners a seamless solution for all their wind energy needs, from development and construction to ongoing operation and maintenance. With a focus on safety, quality, and efficiency, GC Wind Supply ensures clients maximize the potential of their wind energy assets. ■

AMPP CIP 1 AND CIP 2 COURSE IN VIETNAM
STRENGTHEN YOUR SKILLS IN COATING INSPECTION

VIVABLAST is proud to offer the AMPP Coating Inspector Program (CIP) in Vietnam, providing industry-leading training for both entry-level and experienced inspectors. This comprehensive program is designed to equip participants with the knowledge and skills necessary to perform effective coating inspections across various assets.

The AMPP CIP combines classroom instruction with hands-on practical sessions. Through a combination of lectures, group exercises, case studies, and real-life scenarios, participants gain a thorough understanding of coating materials, surface preparation techniques, application methods, and inspection procedures. The program also emphasizes the importance of safety, ethics, and communication in the field of coating inspection. ■

RENEWABLE ENERGY
INTERNAL WIND BLADE INSPECTION

This March, VIVABLAST undertook internal wind blade inspections, a task demanding thorough attention to detail and unwavering commitment to safety. Given the confined spaces involved, VIVABLAST prioritized the well-being of our technicians by adhering to the strictest safety protocols, including comprehensive training, specialized equipment, and rigorous risk assessments.

Our wind turbine technicians are equipped with the latest industry knowledge and cutting-edge techniques to navigate every aspect of the internal inspection process. This ensures not only compliance with customer requirements but also maximum safety for our personnel, a core value at VIVABLAST. We show our gratitude to the cooperation of our valued clients who entrust VIVABLAST with these critical inspections. Through this collaborative effort, we ensured the optimal performance and longevity of wind energy assets. ■

PROTECTION SOLUTION
ROOF WATERPROOFING BY TRIFLEX COATING

VIVABLAST successfully implemented a TPO roof waterproofing system using Triflex coating for a major company in Vietnam. Triflex is a leading innovator in the waterproofing and surface protection industry. This groundbreaking technology combines advanced cold application techniques with high-quality PMMA thermoplastics, setting a new standard in the field. Triflex products go beyond simply waterproofing; they offer exceptional surface protection solutions that ensure long-lasting durability and performance.

VIVABLAST's choice of Triflex demonstrates our commitment to quality and cutting-edge solutions. With over 40 years of experience, Triflex is dedicated to continuous innovation and development. Their comprehensive solutions safeguard and enhance the quality of building structures. The Triflex coating system was applied under the strictest safety conditions by VIVABLAST's experienced team, satisfying the high expectations of our client. ■
